Introduction

AKRIPT is a Utility Token that provides access to a Digitalized, Democratized, and Decentralized Ecosystem will be gradually developed to include several different corporations from various industries that will be fully transformed to increase their efficiencies, disrupt their industries, contribute to society and the environment, and eventually benefit the AKRIPT community.

The AKRIPT Ecosystem

Mining & Real Estate Africa/Malaysia

By projections, the investments in mining and real estate would be worth more than **1 billion GBP in less than five years.**

Pharmaceutical Wholesaler UK

A fully licensed Pharmaceutical Company collects and processes data to add intelligence to the existing business model. Our projections showed that the AKRIPT's platform would be worth **more than 50 million GBP in less than a year.**

Agriculture /Plantation Malaysia

AKRIPT team secured a highly exclusive and lucrative deal with a high-level Plantation in Malaysia, to acquire 50000 aged Agarwood trees and partner with the owners of 2000 acres of land. The project GDV will **exceed 500 million USD within the next 5 years.**

Security & Defense Global

A highly successful Security and Defense company that protects its clients globally has been acquired by AKRIPT management. Its projections show that the total cumulative turnover of the company will **exceed 90 million USD within the next five years**

Medical Cannabis Project Africa/UK

AKRIPT team invested in a project that aims at developing Hemp Genotypes with enhanced traits suitable for diverse cultivation environments.

NFT Art Marketplace Global

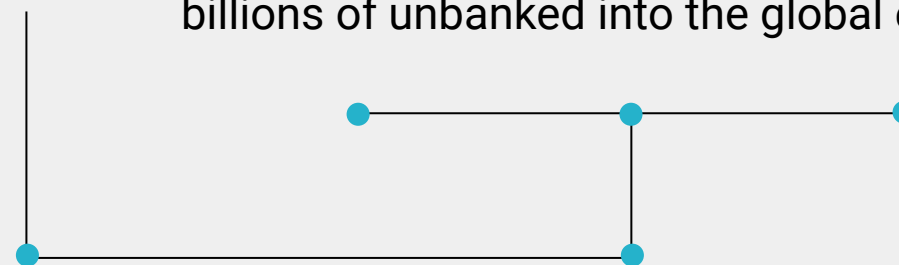

The NFT Art Marketplace will be launched, in order to turn valuable art assets into NFTs, connecting creators, art collectors, artists, and investors.

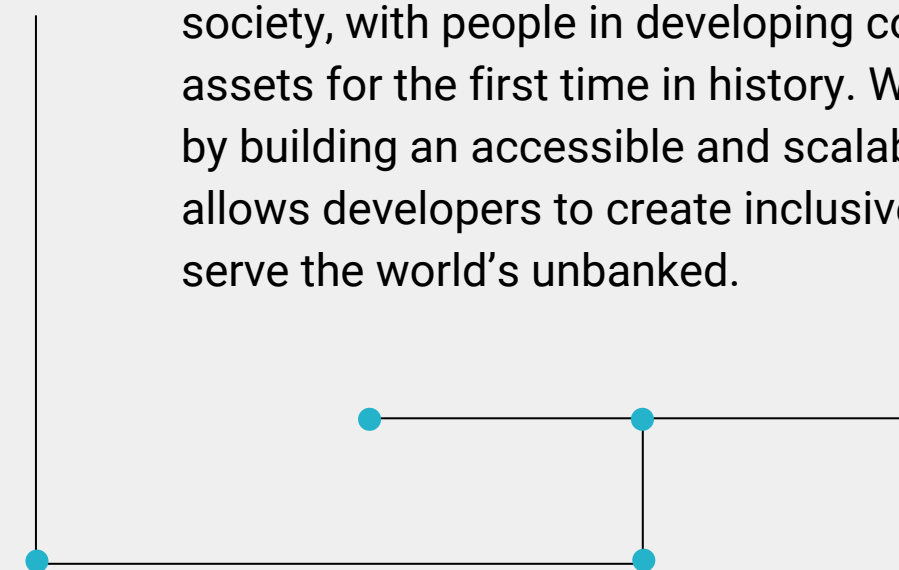

The diversified, dynamic ecosystem flips the economic paradigm on its head by delivering ongoing value and creating the endless potential for the AKRIPT Coin will be launched and used as the core exchange currency of the AKRIPT Ecosystem. Holders of the AKRIPT Token will then be able to convert their AKRIPT Tokens to AKRIPT Coins at an exchange rate that will be decided in due time.

Executive Summary

Our Vision Using decentralized blockchain networks to bring billions of unbanked into the global economy.

Our Mission Blockchain has enabled global economic changes in our society, with people in developing countries accessing digital assets for the first time in history. We strive to disrupt FinTech by building an accessible and scalable infrastructure that allows developers to create inclusive financial applications to serve the world's unbanked.

Our Directives

Create synergies and economies of scale for all system actors

Minimize the administrative tasks for all actors involved

To establish a recognized business services brand

Improve operations efficiency and optimization

Standardize data exchange

To increase choice and value for the customer

Improve system actors' inventory management and logistics

To empower the primary producer by increasing transparency

Keep project managers connected with the primary stake holders

Equip system actors with modern technology

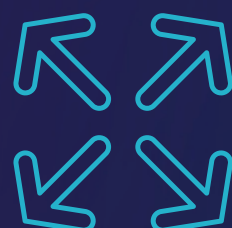

Improve product traceability

To maintain low-cost operations

Growth Strategy

The AKRIPT platform exhibits a dynamic capability to conform to the preexisting strategic objectives until the attainment of stabilization within the AKRIPT platform.

The artificial intelligence models which are to be employed by the entities in the initial stage will subsequently be furnished as supplementary services to the customers of the AKRIPT platform, thus reducing their inefficiencies while simultaneously procuring an unparalleled competitive edge for the expansion of the platform.

INCUBATE

ADAPT

EXPAND

INNOVATE

REBUILD

AKRIPT provides incubation services to established entities. The acquisition will enable AKRIPT to leverage its existing customer base and accelerate its growth trajectory.

The AKRIPT platform will adopt a phased approach, prioritizing the extant industry in its initial phase and progressing towards diversification across multiple sectors in subsequent steps.

The AKRIPT technology is a viable solution for network restoration following disruptions. This technology achieves this by enabling trading partners and consumers to access secured, trusted, and transparent data on goods and transactions.

Tokenization

AKRIPT infrastructure has been developed, tested, and optimized for all modern platforms.

With smart contracts and blockchain technologies, the AKRIPT platform will meet and exceed more than 30% savings to clientele.

500.000.000 AKRIPT tokens

10-14 months

30%

As per AKRIPT's financial estimations the value of the integrated platforms could be worth more than 2.3 billion GBP in less than 5 years

In order to facilitate the growth of the platforms and make them fully operational within next 10-14 months, we are issuing 500.000.000 AKRIPT tokens and each AKRIPT will be worth 1 GBP

1 AKRIPT = 1 GBP

Why AKRIPT?

		USD	BTC	GOLD
Reducing Supply	✓	✗	✗	✗

Based on Fundamentals not Speculations	✓	?	✗	✓
Store of Value	✓	✗	?	✓
No Storage Costs	✓	?	✓	✗
Continues Creation of Value	✓	✗	?	✗
Disruptive Use Cases	✓	✗	✓	✗
Delivery of Benefits / Rewards	✓	✗	✗	✗
Positive Social Impact	✓	✗	✗	✗

Blockchain Technology

The AKRIPT commercial platform will be based on the Ethereum blockchain. This enables us to use the functions of the Ethereum blockchain for decentralized trading. Every transaction is recorded on the public Ethereum blockchain, and the "smart contracts are used to implement commercial agreements.

When comparing different blockchains, we choose to stay on the ETH network, as it is already secure and well-established and genuinely allows us to remain decentralized.

The top priority is to ensure that the project is free to change and evolve with zero outside regulations impacting it , and ETH is the way to achieve this goal. Our army is able to hold its tokens in a wallet and collect payments from around the world, all while remaining independent of moderating forces.

ERC20 Token

An ERC20 token is a standard used for creating and issuing smart contracts can be used to create smart property or tokenized assets that people can invest in.

AKRIPT Token Allocation

Seed Investors	10%	50,000,000
Public Sale	30%	150,000,000
Airdrop	5%	25,000,000
Ecosystem	10%	50,000,000
Advisors	5%	25,000,000
Liquidity Pool	15%	75,000,000
Staking Rewards	15%	75,000,000
Burn	10%	50,000,000

Release Schedule

AKRIPT will be unlocked in a pre-determined schedule which lasts for 66 months from the public sale. The initial circulating supply is set to 90,000,000 AKT - 18% of the total supply. The total supply is 500,000,000 AKT

Public Sale ● Seed Investors ● Airdrop ● Ecosystem ● Advisors ● Liquidity Pool ● Staking Rewards ●

Incentives for Seed Investors

DISCOUNT

Seed investors can acquire AKRIPT at 50% discount (1GBP = 2 AKT)

BURN

10% of the token will be burned, minimizing supply, thus creating appreciation of the token price. Further to this, 1% of the transaction fees, received, will also be burned on every transaction

LIQUIDITY POOL

15% of the supply of tokens will be kept to support the liquidity pool, keeping the token price stable

FUNDS LOCKED

Founders will lock 20% of their tokens in a reputable Crypto Exchange for at least one year.

LOCK PERIOD

Only 20% of the private sale tokens will be unlocked during the first year of the AKRIPT public sale. The rest of the private sale tokens will be unlocked quarterly over the next 2 years. This process will be controlled with smart contracts.

BUY BACK FUNDS

A smart contract will be created, where Seed Investors will have the option to sell their tokens by the end of the second year, with return of 100%.

STAKING

At the end of the first year, rewards are distributed fairly across token holders, on a quarterly basis, thus the token holders will benefit from price appreciation plus dividends.

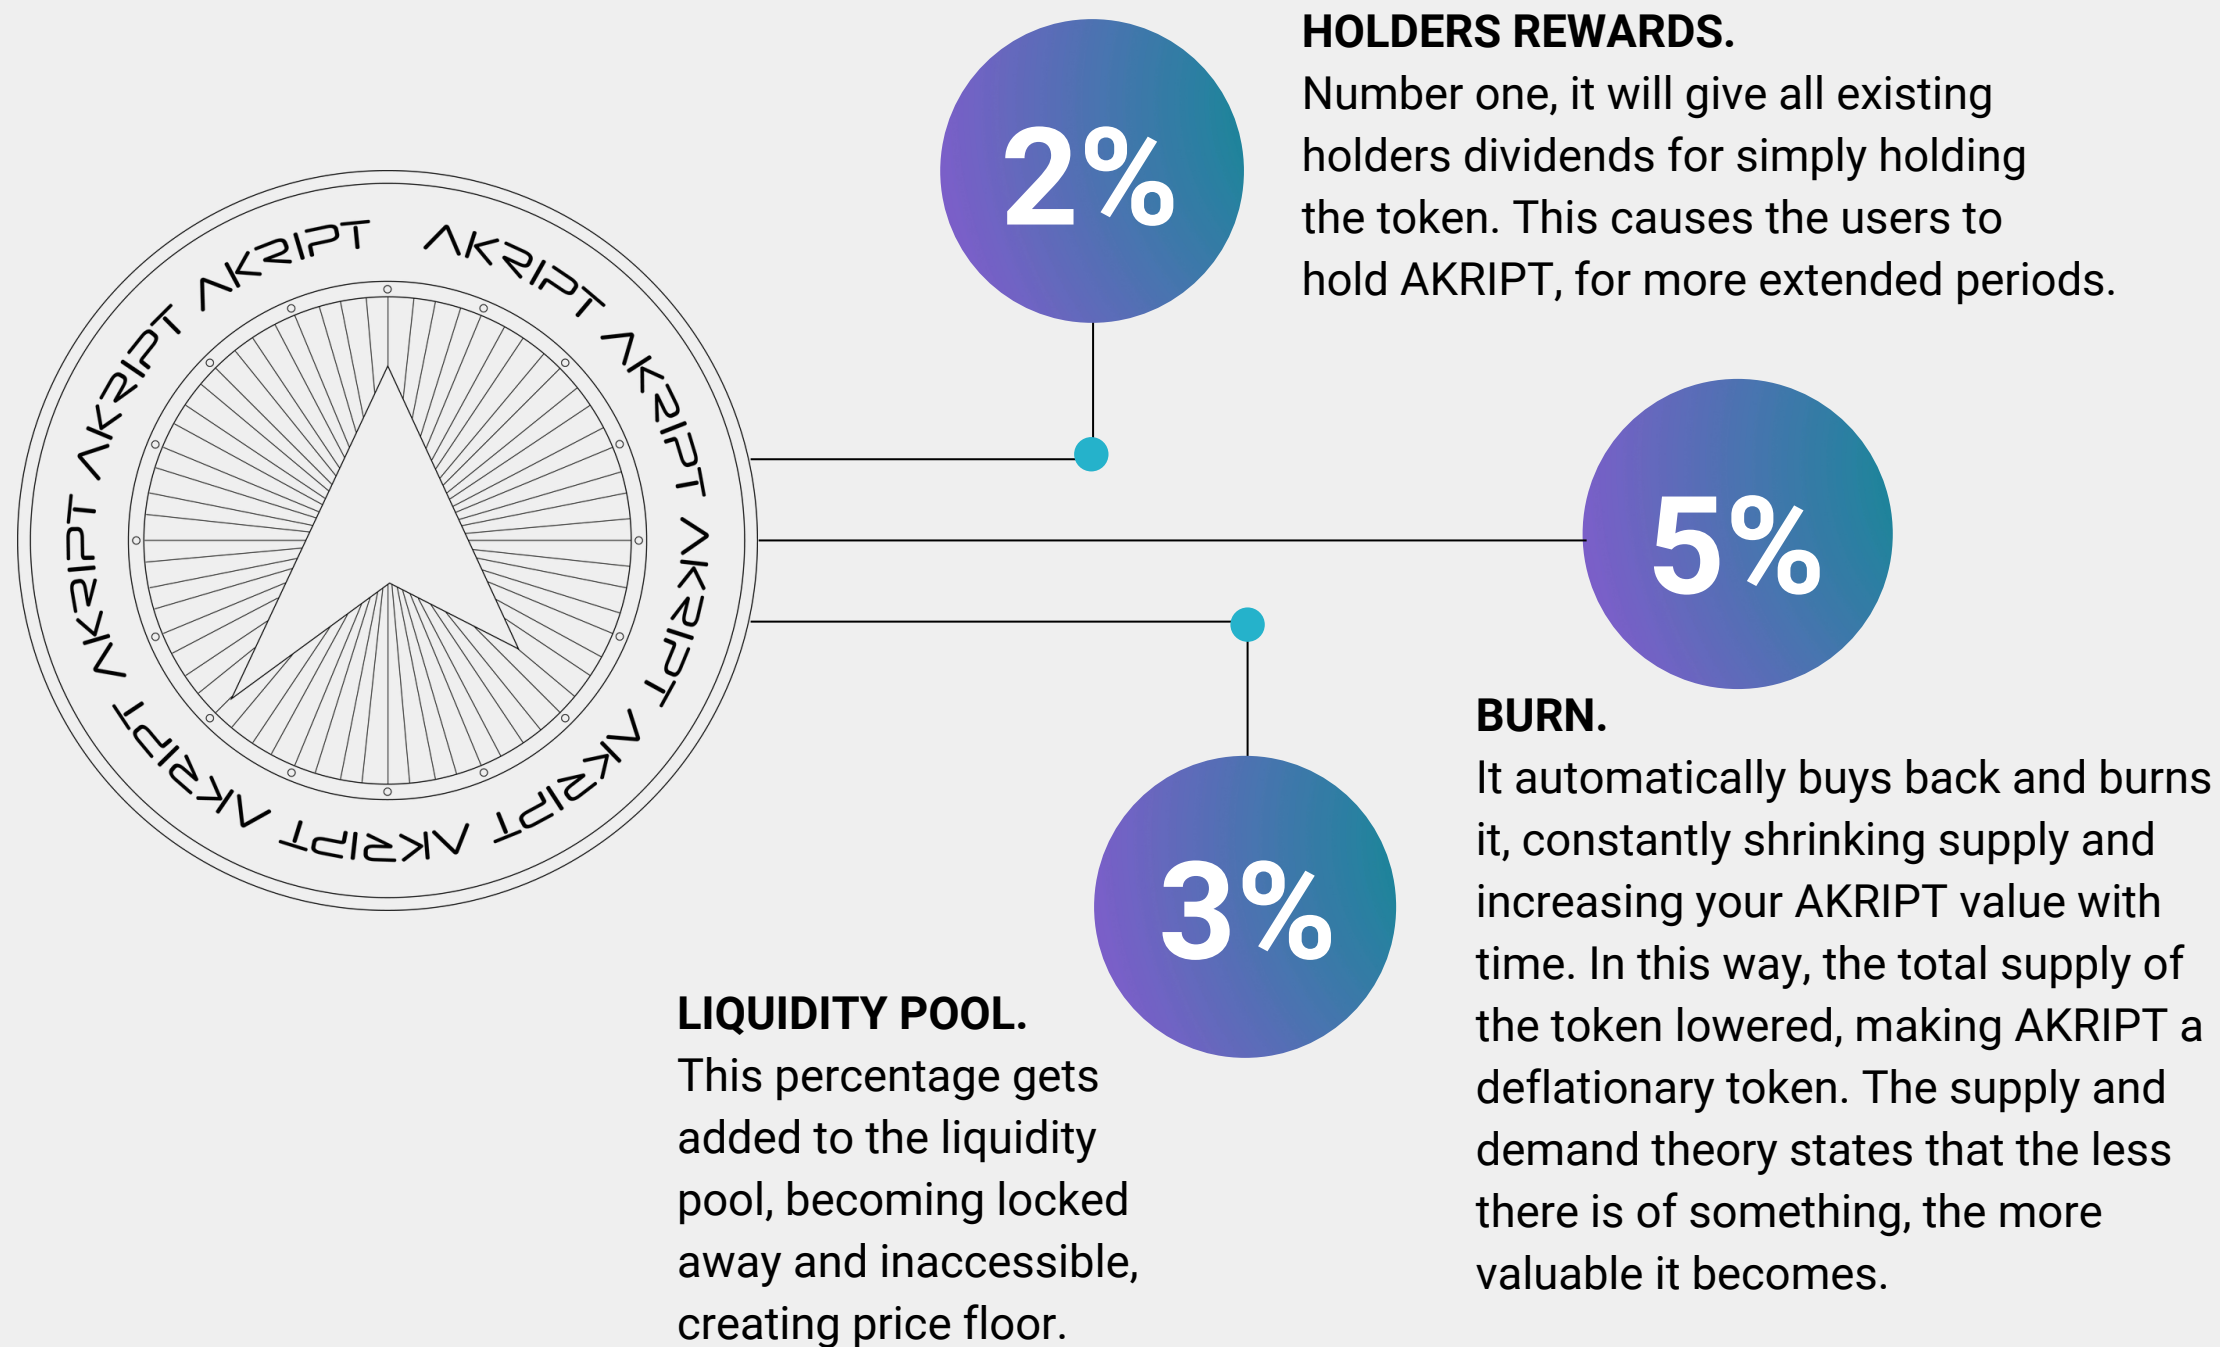

CONTROLLED PUBLIC SPACE

Only 30% of the supply will be available to the public sale.

Transaction Tax

AKRIPT token (AKT) is an ERC20 token that has a 10% tax on every transaction. This tax is automatically distributed using a Smart Contract.

Those who decide to hold their AKRIPT are rewarded as opposed to those who sell, so this mechanism encourages holders and discourages pump and dump traders. Holders are incentivized to hold their tokens because their holding will increase over time. And even if AKRIPT investors take no action, they still collect additional AKRIPT just by holding them.

Investors' Protection

LP LOCKED

The Liquidity Pool is locked, which means it can't be rug-pulled, thereby protecting investors

AUTO LP GENERATED

The auto Liquidity Pool help create a price floor for the token and also helps make the price more stable

BOT KILLER SMART CODE

Our bot killer code helps protect against trading bots that try to manipulate crypto prices

MULTI SIGNATURE WALLET

To provide extra security, a minimum of 3 signatures are required to unlock the Seed Investors Wallet

ANTI-WHALE MECHANISM

Number one, it will give all existing holders dividends for simply holding the token. This causes the users to hold AKRIPT, for more extended periods. In the cryptocurrency world, an anti-whale mechanism is a functional system that checks or counters the activities of the crypto whale(s) who use their immense wealth to manipulate the price of a cryptocurrency, this may include heavy volume selling of cryptocurrency to create a panic or run in the market. Retail investors bear the brunt of panic selling when faced with an unverifiable reason for a decrease in the price level. Retail investors incorrectly assume there is negative news that they simply don't have access to yet. Retail investors incorrectly assume whale(s) have some special knowledge and are selling quickly before the news becomes public.

To combat the problem, we've created "whale protection." Basically, if a large account holder wants to make a big sale, he'll have to deal with additional fees. This incentivizes him to either not sell or make sales across a larger time frame. well, those extra seller fees go into the Holder's Reward System. This means that if a whale wants to make a sale, he has to pay the community extra tokens for it to go through. For users, this puts more tokens in their wallets and helps keep the price of the token stable.

Transactions (sell/buy and wallet transfer) that trade more than 0.1% of the total supply will be rejected. This will protect price movement as well.

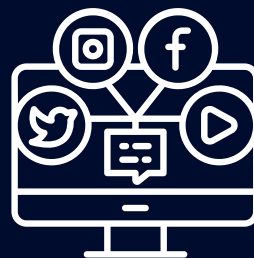

The Road to ICO

A state-of-the-art website is under development that will provide a strong impression to the target audience. The website will cover the details of the ICO project.

A digital marketing campaign will be prepared, using a specialist adviser.

Bounty campaigns will be launched, and Airdrop platforms will be used to execute the campaigns. A number of Airdrop tokens will be given to different users and influencers all over the world to incentivize them to promote token.

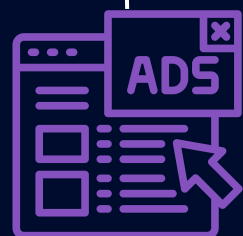

Participation in the leading events, conferences and trade shows.

Form partnerships with numerous marketing/crypto influencers.

Paid promotions, advertising and sponsoring key events that attract target audience.

An advertising agency will be hired to prepare press releases etc. to promote the token to target audience.

One or two popular Exchange Platforms will be used to market the Token all over the world.

Five million of AKRIPT will be given to Retailers and Suppliers as Loyalty Points. The Token supply will be gradually increasing in the system (more users) but because they will be keeping it in their wallets, price will be going up.

Use social media to reach the cryptocurrency community and utilizing apps such as WhatsApp and Telegram, to keep the AKRIPT community updated.

The management team will be delivering podcasts and giving interviews.
